Git/Github

WORK EXPERIENCE

IT Compliance Analyst   **Sept 2021 - Present**
Capgemini

- The time taken to generate a compliance and risk report manually for many clients takes 1 hour or more. So to improve the performance of creation of reports I built automation tool using python which brought down the time taken to do the same task to 10 seconds through automation. This improved the efficiency of the entire team on a long run.
- Help client by protecting their servers and workstations from malicious threats by using McAfee ePO and citrix and also resolve issues that gets escalated through SNOW(Service Now portal).

Intern   **Mar 2021 - May 2021**
Donyati

- Created a web testing script using selenium library on Python to perform web testing on Oracle EPM cloud assurance product.
- Performed back-end testing using RestAPI based module called epmautomate and PowerShell to perform integrity checks

EDUCATION HISTORY

Bachelor Of Engineering : Telecommunication Engg
CMRIT   **2017-2021**
